

- Reducing its own greenhouse gas emissions...
- Supporting the reduction of greenhouse gas emissions by other communities
- Contributing towards agreed national emission reduction targets...
- Using appropriate research frameworks and data to inform its own strategies, decision-making and leadership activities.
- Encouraging the community and business to transition to more sustainable lifestyles that reduce their climate change impacts.

3. Adapting to Climate Change – IVC Action Collaborati

Climate change impacts are not shared equally across Australia. Whilst risk from bushfire is broadly shared, the impacts of sea level rise are more acute in coastal areas, and the impacts of drought are more acute in inland areas.

Community

- Supporting research that assists in effective action by all stakeholders in climate change management.
- Informing individuals, communities and businesses understand the impacts of climate change, and the role they play in adapting to it.
- Ensuring that planning, investment, and project decisions take into consideration the likely impact of climate change through:
 - Including the impacts of current and future human settlements, natural resources, and ecosystems.
 - Investment or project.

4. Engagement and Inclusion – Equity and Social Justice

The City acknowledges the impact of climate change on a global and local scale, and has a duty of care to its citizens.

- Advocating that the burden of reducing greenhouse emissions must be equitably dispersed.
- Supporting development of policies and strategies that identify and minimise the impacts of climate change.
- Working with State and Commonwealth governments to resource mitigation, and resilience in the community, public measures.

5. Climate Change Action Priorities

The City will continue to work with its partners to address climate change and its impacts on the community.

- Resolving to work with its partners to address climate change and its impacts on the community.
- Addressing the priority of the City's achieving net-zero plan.
- Reviewing and updating its coastal hazard and risk mitigation and adaptation plan.
- Working with its partners to support the community to work with its partners to address climate change and its impacts on the community.

KEY TERM DEFINITIONS

Adaptation means modifying decisions, activities, climate.
